

Assay Performance Data

Naam assay:	Thyroïdperoxidase IgG As [eenheden/volume] in serum of plasma [LOINC 18332-7]
Methode, fabrikant:	Fluorescence Enzyme Immuno Assay (FEIA) – ImmunCAP Phadia 250, ThermoFisher Scientific

Traceerbaarheid:							
Gekalibreerd naar	Afkomstig uit de bijsluiter: Reference material: The ImmunoCAP Specific IgG Calibrators are traceable (via an unbroken chain of calibrations) to the International Reference Preparation (IRP) 67/86 for Human Serum Immunoglobulins A, G, and M from World Health Organisation (WHO). The calibrators are used for determination of Autoantigen specific IgG antibodies. The values are expressed in mgA/l, where A represents antigen-specific antibodies. By using a conversion factor included in the software, the values are expressed in IU/ml. The conversion factor has been determined by means of NIBSC research standard for anti-thyroid microsome serum code 66/387.
